A Novel Method for Handwritten digit Recognition

What do they THINK AND FEEL?
what really counts

major preoccupations

worries & aspirations

- where we to find resources to learn
- what are the prerequisites to this project
- Can we complete in time
- what kinds of CNN model can be applied
- what percentage of accuracy can we obtain?
- what sectors will be benefited
- keep on learning the concept to get better results
- can it be applied in real time camera apps
- How do you choose the model, metrics for measure, so that it can recognize good

What do they HEAR?
what friends say

what boss say

what influencers say

- will this project have an impact in required sector
- Learn several research and reference
- already existing solutions are available
- Try to avoid mistakes andmake decisions correctly
- Give equal importance to all members in the stakeholders
- make better documentation so it helpful in future
- implement with some creativeness
- decide the performance metrics and work to improve it

What do they SEE?
environment

friends

what the market offers

- will the project stay in the market with competitors similar project
- have to submit the deliverables in time
- Have i understood the main core idea of the project
- what are the unique features that attracts new users to your software.

What do they SAY AND DO?
attitude in public

appearance

behavior towards others

- communicate regularly with team members
- perform good data preprocessing
- Progress step by step to acheive goal
- develop the required skills
- follow the guidance from higher authority for smooth ongoing
- complete intermediate tasks on time
- avoid last minute hurry, allocate proper time
- split the workload even between members

PAIN
fears

frustrations

obstacles

- can we may it affordable to all
- what happens if accuracy is not good
- data Preprocess
- Building the model
- Setting the right parameters
- building good UI/ UX

GAIN
"wants" / needs

measures of success

obstacles

- more customers attracted
- Increase team coordination
- Gain to our company in terms of income
- Saves work and time
- useful for postal, banking
- helpful in number plate recognition
